

Each school is unique but all schools face the same type of challenges. Administration and communication are two of these type of challenges. Dbeatle offer solutions to schools to assist them in their day-to-day tasks and management.

We have a wide variety of solutions that will help you in learners' attendance, learner discipline, LTSM management. We even have solutions that will assist you in your school's award certification.

Software developers usually charge clients per user access. We believe that your annual license will give you unlimited user access to ALL our solutions!

How does dbeatle fit into my school?

Most public schools use the SA-SAMS program for Administration Management purposes. SA-SAMS can unfortunately not be tailor made to fit and change according to each school's unique operation, management, situations and rules. This is where **dbeatle** will add value to your school.

Dbeatle retrieves the needed information from SA-SAMS. We therefore do not want you to duplicate your work. Learner information, parent information etc will be retrieved so that **dbeatle** solutions can work. The **dbeatle SERVER** can be installed on the same computer or server that runs SA-SAMS or it can be networked. All other software can be installed on other devices or computers.

One annual license gives you unlimited user access to all our solutions!

dbeatle SERVER

Code of conduct management system

You can choose between 4 different styles of managing your school's Code of Conduct system. We are able to change/develop our system if necessary.

- "Debit/Credit SumTotal system". Automatically do calculations to determine on what level learners are. Assign learners to those levels for example detention classes.
- "Separate Debit and Credit system". Conduct regarding debits are kept separate from those in the Credit system. Will separately determine on which level the learners are for debit and for credit.
- "Conduct determines action system" Each type of conduct deserves a different approach. Our solutions will automatically determine what the learners deserve.
- "Count the conduct". Each type of conduct done a number of times determine an action.

How it works: The dbeatle administrator extract SA-SAMS school rules and determine which will be used on the dbeatle APP. We assist in the setup of your school's Code of Conduct system. Educators use any device to assign conduct against learners. The dbeatle administrator downloads this information. The dbeatle SERVER shares this conduct to SA-SAMS. The dbeatle administrator use the dbeatle server that automatically determine levels or actions against learners. Conduct reports and sms messages can be send in the language of instruction of each learner.

Learner Attendance

Educators and staff members can complete school attendance on the dbeatle APP. Learners can be assigned to a group and the group can be signed out. Beneath each learner's name it will display "Absent from school" or "Signed out". The dbeatle administrator will download the information to dbeatle server. The absence from school will be shared to SA-SAMS. The dbeatle administrator will also be able to send notifications to parents of their children who are absent.

If Educators registered their own Time Tables on the dbeatle APP, our dbeatle SERVER will print their class attendance registers for them! Our system automatically emails a summary report and a list of learners names daily to a designated person in your school. This report is in Microsoft Excel format.

Dbeatle Communicate

General sms messages can be send to parents. The school can decide if only Parent 1, Parent 2 or both should receive the message. Learners can be selected as the whole school, only a certain grade, certain group, certain subject etc.

Messages like learners' conduct and absence that are built automatically will be in the language of instruction of the learner. Messages are not automatically sent by our solutions. The dbeatle administrator decides what and when will be send.

Schools can use any vendor for sms messages providing that the vendor can send it in the format we provide them. The costs of sms messages is not included in the annual dbeatle license fee.

Dbeatle ACADEMIC solution

Extract academic information to assist in moderation reports. Pre and Post moderation of SBA or class moderation can be done. Wide variety of reports to assist management with totals and achievements of learners and their educators.

Dbeatle LTSM

Register your own titles and number of books. The system builds unique stickers for each book. The books can now be issued to learners or educators via the dbeatle LTSM that can be installed on networked computers or via their dbeatle APP. You can turn your dbeatle APP into a scanner and easily issue or return textbooks. The dbeatle LTSM keep stock and history of each book. This information is not shared with SA-SAMS.

Dbeatle AWARDS

Automatically extract learners' information from SA-SAMS. The Auto Academic feature is pre-programmed according to your school's criteria. This will include what wording will be used as well as the layouts on the certificates. You can also register your own type of awards and then assign it to many learners. The solution will determine the correct language display for each learner.

A number of reports are available. You can easily see which learners did not receive awards or what awards have not been assigned. Your Master of Ceremony's list is also automatically built while you are registering awards to learners.

Dbeatle APP

The dbeatle APP can be used on any device. Educators and staff members are given access to the dbeatle APP. You can be logged into more than one device at the same time. The dbeatle APP can assist you in:

- COVID screening. Do your own COVID screening or learners' COVID screening. This can be done faster by barcoding ID that the dbeatle server can print for you. Beneath each learners name will "COVID Screen not done" or if the learner was screened his/her temperature etc.
- School Attendance. Make use of our multi-select feature and easily search for a learner or class and check the learners who are absent. Beneath each learner's name it will display "Absent from school" Easily see your subject you are teaching and how many learners are absent or signed out.
- Sign learners out. Learners or groups can easily be signed out. Beneath each learner's name it will display "Sign out" or for example "Sign out u/15 Rugby Team"
- Learner Discipline. Easily select your learners you are teaching. Make use of our multi-select feature to mark "Homework not done" or select individual learners and assign conduct against them.
- Any one can see all registrations that were done on the dbeatle APP but only you and the assigned POWER USERS can edit this information.
- Access parent contact details. No longer do you have outdated information. Email directly from your device. The system will automatically complete fields like To and Subject line. The user will however pay at own costs if he/she phones directly from APP or send a sms message to the parents.
